Paper 1

October/November 2018

MARK SCHEME

Maximum Mark: 75

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2018 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This syllabus is approved for use in England, Wales and Northern Ireland as a Cambridge International Level 1/Level 2 Certificate.

This document consists of **13** printed pages.

PUBLISHED**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer	Marks														
1	<p data-bbox="320 215 936 247">1 mark for each correct line, maximum 5 marks</p> <table border="0" data-bbox="320 295 1534 1412"><thead><tr><th data-bbox="320 295 728 343">Device</th><th data-bbox="1131 295 1534 343">Description</th></tr></thead><tbody><tr><td data-bbox="320 343 728 486">Laser Printer</td><td data-bbox="1131 343 1534 486">Uses a high-intensity beam of light shone through three layers of changing pixels</td></tr><tr><td data-bbox="320 542 728 686">LCD Projector</td><td data-bbox="1131 542 1534 686">Uses millions of micro mirrors to reflect light through a lens</td></tr><tr><td data-bbox="320 742 728 885">Digital Light Projector (DLP)</td><td data-bbox="1131 742 1534 885">Uses plastic, resin or powdered metal to generate a physical output</td></tr><tr><td data-bbox="320 941 728 1085">Inkjet Printer</td><td data-bbox="1131 941 1534 1085">Uses a static electric charge on a rotating drum to generate a physical output</td></tr><tr><td data-bbox="320 1141 728 1244">3D Printer</td><td data-bbox="1131 1141 1534 1244">Uses liquid ink to generate a physical output</td></tr><tr><td data-bbox="320 1300 728 1412">2D Cutter</td><td data-bbox="1131 1300 1534 1412">Uses a high-power laser to generate a physical output</td></tr></tbody></table>	Device	Description	Laser Printer	Uses a high-intensity beam of light shone through three layers of changing pixels	LCD Projector	Uses millions of micro mirrors to reflect light through a lens	Digital Light Projector (DLP)	Uses plastic, resin or powdered metal to generate a physical output	Inkjet Printer	Uses a static electric charge on a rotating drum to generate a physical output	3D Printer	Uses liquid ink to generate a physical output	2D Cutter	Uses a high-power laser to generate a physical output	5
Device	Description															
Laser Printer	Uses a high-intensity beam of light shone through three layers of changing pixels															
LCD Projector	Uses millions of micro mirrors to reflect light through a lens															
Digital Light Projector (DLP)	Uses plastic, resin or powdered metal to generate a physical output															
Inkjet Printer	Uses a static electric charge on a rotating drum to generate a physical output															
3D Printer	Uses liquid ink to generate a physical output															
2D Cutter	Uses a high-power laser to generate a physical output															

Question	Answer	Marks																																
2(a)	2 marks for 3 correct bits, 1 mark for 2 correct bits <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th>Parity Bit</th> <th></th> <th></th> <th></th> <th></th> <th></th> <th></th> <th></th> </tr> </thead> <tbody> <tr> <td>0</td> <td>1</td> <td>0</td> <td>1</td> <td>0</td> <td>0</td> <td>1</td> <td>1</td> </tr> <tr> <td>0</td> <td>1</td> <td>0</td> <td>1</td> <td>1</td> <td>1</td> <td>1</td> <td>1</td> </tr> <tr> <td>1</td> <td>1</td> <td>0</td> <td>1</td> <td>0</td> <td>0</td> <td>0</td> <td>1</td> </tr> </tbody> </table>	Parity Bit								0	1	0	1	0	0	1	1	0	1	0	1	1	1	1	1	1	1	0	1	0	0	0	1	2
